Acknowledgement

To the Eternal Mind that possess the treasures of all knowledge and wisdom. To God who alone give all the inspiration and insight I give the praise.

To everyone that contributed to this book – Akintunde Ajibesin, Emmanuel Ojodun, Tope Osikoya and Kehinde Otesile – I celebrate you all. Your investment remains eternal.

I love all pastors, leaders, workers and members of Rebirth Global Church. You are highly honored.

NOTE

This was the first book I wrote when I was in Port Harcourt. In fact, I already completed this book before I ever wrote the first book I released in 2017.

It was in the later part of the year 2020 that I was moved in my heart to bring out the manuscript where I kept it. I believe that the contents of this book will be a blessing to you. The few people that read this book have testified that it was really impactful.

Certainly, you will begin to operate at a great level of insight by the time you finish reading this book. I call you a seer.

1

YOU ARE A SEER

THE WORLD OF SEERS

The seers' channel is sight. They see pictures and hear sounds. Every seer need to understand what they see. Every seer must have the ability to interpret what they see. They need to develop their capacity to interpret. Any seer that doesn't understand the rudiment of interpretation will make a mess out of what is seen. Seers don't function with their physical eyes but with their inner eye behind the corner of the brain.

The seers' element of communication is divers and multi. They see colors, objects, animals, images, places, and beings of different kind. It's needed that seers understand that whatever is seen doesn't mean the same thing for everybody. An object can mean something to me but God will use the same object to communicate another thing to another man. A pair of shoe may mean marriage to someone while God will use a pair of shoe to communicate travelling to another person. All seers have consistent flow of the dreams of the night and open vision.

All seers are prophets but not all prophets are seers. As we

have kinds of prophet, likewise we have different kinds of seers.

THE ETYMOLOGY OF THE WORD SEER

The proven fact is that whoever can see what others are blind to see is a seer. It must be noted that the word *seer* is not a biblical term, it has its origin in the *Akkaddian* language. From the *Akkaddian* language, we understand that those who see things others don't see are known as *seers*. Later on, the generations of men began to get the concept of dreams – dreams in this context are images and motions seen when you sleep. Since, the dreamer is the one who now sees what others don't see, they, *The Akkaddian Speakers* decided to refer to dreamers as *seers*.

Later, the understanding of men grew from dream to seeing open vision. That is when you see the invisible when you are awake. Human began to notice that some men seemed to be expert at seeing details in the unseen realm. It's later discovered that a deity is behind this and not just the use of imagination.

As succeeding generations emerged in ancient time, people began to carve out gods and idols for worship. In this manner, some people were identified to see the invisible world of the gods where physical eyes and contact cannot penetrate. With the evolution of religion and deistic worship, human developed several spirito-communication media through which they could connect with the unseen world and the powerful deities over there. Those individuals with the unique ability to see into the invisible space and dialogue with the invisible beings are called seers.

Before the emergence of the nation of Israel, there had been the existence of some other nations. Nations like Babylon, Egypt, Jerusalem had been in existence before the creation of the nation Israel. The Israelites came to dispose those who occupied

Jerusalem in ancient times. The origin of Israel can be traced to Abraham when God called him out. The Jewish nation began with Abraham.

Israel is God's nation in the Bible, but the word *seer* was not generated from Israel. You will realize that there were gods in Egypt (precisely ten gods). That was why Moses performed ten miracles because each of the miracles was attempted against each of the gods and they were all conquered. The Egyptian had their seers too. The seers in ancient times didn't rely on imagination but on spirits. They made chant and code incantation with words in order to connect and communicate with the invisible world.

THE WRONG ASSUMPTION

Some people assumed that Latin language is part of the language used in writing the Bible. But this is not correct because it was the inscription placed on the cross of Jesus that was written with Latin not the Bible. The inscription *The king of the Jews* was written in some languages including Latin and placed on Jesus' cross by the instruction of Pilate and Pilate was not among the Bible writers.

Later, as the Hebrew language advanced, speakers therefore employed the word *seer* and brought it into their language. The proton effect of borrowing this word is that the Hebrew only adopted the second or later meaning of the word *seer* – that is, someone who can see things differently. The Hebrews believe before you can be called a seer, you must have the capacity to see into the esoteric world with your inner eyes.

Today, a seer in the Hebrew or Jewish world has nothing to do with imagination or ability to see differently. They didn't adopt this name for creative people so it will not be confusing

and they (the creative ones) will not think they are on the same level or the same with the prophets (seers) of God. The Hebrew gives supreme honor to God's prophet and will never share their identical name with anyone who is inclined to the imaginative world.

The Greek on the other hand loves wisdom – they are scholastic and knowledgeable. They can do anything to get wisdom and knowledge. This is what religion should also pursue – men and women should be enlightened to pursue education and wisdom so they can have accurate insight into the supernatural and spectacular. The Greeks are more logical than being esoteric. The fact is that thinking and imagination dominate the Greek world. You can only reign in the Greek world if you are philosophical and psychological. To the Greeks, all spiritual matters and insights must be expressed through philosophy.

The Greek are therefore the opposite of Hebrew. They also adopted the word *seer* for someone who can see. Seers to the Greeks are not seers to the Hebrews. The Greeks refers anyone who is creative with imagination, who sees what others don't see and understand things better from different perspective to a seer. To a Greek, if you can use your imagination well, you are a seer. But to be a seer to a Hebrew man, you should be able to see what God shows you.

Going by the notion and perspective of the Greeks, it therefore means that if you can see things in your mind, you are a seer. The Greek world also shares the perception of the Hebrews by naming anyone who has the spiritual powers to see the unseen world a seer. Anyone referred to as a seer by the Hebrew is a seer, but it is not all referred to as a seer by the Greek that the Hebrew agrees is a seer.

For the purpose of our discourse, we must agree that anyone

who can see with his imagination (a part of the mind) is a seer. You are a seer because you have imagination.

MIND USERS ARE TRULY PROPHETS AND SEERS

Do you know that poets, dramatists, satirists, and prose writers are called poetic prophets and literary seers? I ponder on this usage of words because I understand what is taught as register and discourse.

In the study of English language, there is a topic “discourse” which is sub divided into three which are – *field of discourse*, *mode of discourse* and *tenor of discourse*. In my opinion, I used to assume that referring to a person as a poetic prophet or literary seer is wrong. Technically, that combination of words has violated the grammatical laws. As I advanced in my study I discovered that they are truly prophets and seers. Many of these individuals don’t have the Holy Spirit neither do they have supernatural visions but they foretold events that came to pass. How could they be so accurate and precise? The reason for such was because they saw what others couldn’t see. They saw things just by correct reasoning and effective use of imagination. Many of these people have a way of sedating their mind to arrive at the realm of inspiration. They empty their mind and are eventually lost in imagination.

GOD CREATED YOU WITH DUAL SIGHT

What has enfeebled our sight capacity in the body of Christ is that we only bend to the side of the Hebrew (the Jewish community) alone. We believe God is the only one that can give vision and cause men to see the unseen. We haven’t emphasised that anyone and everyone can access the unseen by the use of the inner eyes.

The fact is that you can seat in your room or space and close your eyes, then suddenly you begin to see yourself sitting on the beach shore. How did that happen? How can your body be in the office or room and your mind is at the beach? That is imagination at work.

If you close your eyes now, you can imagine your wife or friend sitting beside you. You can see yourself on a horse sipping a drink from a drink can. How could that happen? You sit on your arm's chair in your sitting room and at the same time you see yourself sitting on a horse within your mind. How can you be here and there at the same time? This is very powerful. That is the power of imagination.

You can only see at that moment with your physical eyes but it takes your inner eyes to see beyond the moment. The Hebrew and the current church life don't place emphasis on the use of the eye of the mind, but the Greeks do that and the emerging church life will teach that too. It is time we restore the use of our inner eyes.

However, you know you are a seer. God created you with dual sight to see the seen and the unseen. Everyman regardless of race and gender, colour and language has the imaginative sight. You are a seer. You can see the unseen and God expect you to create the seen with this.

The assumption of most leaders and pastors is that Christians can go wide and do the unexpected when they begin to deploy the use of their imagination. We believe people can go carnal when they begin to create things in their mind. This is not correct. I believe you can be a wonderful Christian and be creative at the same time. It's time we get creative and begin to see differently within us.

IMAGINATIVE SEER

There are prophetic seers and imaginative seers. You need the aid of another spirit to be a prophetic seer but you need meditation to be an imaginative seer. Some people are so blind that the only things they see are physical things. What makes you an imaginative seer is that you always have insight into things. If you can perceive the outcome of things before they are done, then, you are a seer. If the effect of things doesn't catch you unaware because you have already seen it before it happens, then, you are a seer.

Often you can't explain how you knew but you just realized you predict the effect or outcome of events because you already perceived it. That is why the Greek philosophers did some exploit. They talk about things in century to come. Anyone that has the imagination production of the future is a seer. Someone will say that it is not possible, you need God to do that. I agree that God shows the future but some people can predict the future without the help of any spirit(s). Is God needed to make weather forecast? And you must know that God can tell weather forecast, but some people have studied weather in a way that they know the rudiment and have the equipment needed to forecast the weather. Why is their forecast correct? Yet they don't invoke any spirit or approach God to do that. They have gained mastery over weather.

Do you see the imaginative and the creative power of men? If some people can tell weather forecast precisely, then some people have accurate insight into the future in times past. Some philosophers are called seers because by their knowledge and wisdom, their prediction of future events have come to pass.

One of the qualities of these imaginative and creative seers is that they often have insight into what things should be called.

They give names to objects, things and events even though some of these names are considered arbitrary – that is, the name doesn't correspond to the item but by description, they are able to identify an object with his name.

THE LANGUAGES OF THE BIBLE

Note: *The content of this chapter shouldn't be part of this book, but I was inspired by the Lord to permit it to be included. I perceive this chapter will bring clarity and answer to the question in the heart of someone.*

THE LANGUAGES USED IN WRITING THE BIBLE

Seminary students have been taught by professors of theology that the Bible was written with three languages which are: Hebrew, Aramaic, and Greek. However, some identified three because I know some who believe that the Bible is written with two languages which are Hebrew and Greek. Those who said two are the one who gave one language to the Old Testament and another to the New Testament. They gave Hebrew to the Old Testament and Greek to the New Testament. They assume the Old Testament books were written with Hebrew while the New Testament books were written with Greek. They are correct but not completely correct.

Other scholars went further to enumerate three languages which are Hebrew, Aramaic and Greek languages. Their summary is that the Old Testament was written with both Hebrew and Aramaic while the New Testament was written with Greek. A distinct study and examination of language used in the Bible shows that it's not two neither three. The languages used to write the Bible are five which are:

1. Akkaddian
2. Old Babylon language
3. Hebrew
4. Aramaic
5. Greek

Do you remember that Jude in his epistle quoted the prophecy of Enoch? Where did he find Enoch's prophecy? I hope you know that that prophecy wasn't written in any of the Old Testament books? Enoch was seventh from Adam, how was Jude able to access that detail? He got it because Enoch wrote it. I marvel when I hear preachers say certain words like all that was said in the Old Testament books have been fulfilled. But the quotation of Jude was Enoch writing. It was a statement made even before the Old Testament days began. Enoch prophesied in the dispensation of the patriarchs. It's an evidence from the scriptures that the prophecy of Enoch refers to the second coming of Jesus our Lord which everyone is expecting. We expect our Lord to come one day – that day is called the day of the Lord. You must be able to distinguish between the Lord's Day and the day of the Lord.

I hope you know that Enoch didn't speak Hebrew. Although,

we don't have the precise information of the exact language spoken in the days of Enoch, but it is generally accepted by scholars that probably Enoch spoke the Akkaddian language.

THE LORD'S DAY AND THE DAY OF THE LORD EXPLAINED

The Lord's Day is the resurrection morning (Sunday), while the day of the Lord is the day Jesus will appear in the cloud again. If Enoch spoke the prophecy, with which language was the prophecy written? He wrote it not with Hebrew but the Old Babylon language. Now you see that everything said in the Old Testament times hasn't been fulfilled – The prophecy of Enoch has not been fulfilled. Enoch, the seventh from Adam already saw the second coming of our Lord. He saw beyond the destruction of the former world, beyond resurrection and ascension of Jesus, he saw the end of the world.

It's believe the name of the unison language the whole world speak before disruption of one language was the Old Babylon language, the new version of the Old Babylon language in the Bible is the Aramaic language. We discover that the Aramaic become the language of Babylon. In the days of Noah, there was no Hebrew as we all know that Abraham who became the Jewish patriarch was a descendant of Shem.

3

KINDS OF SEERS

It is needed to understand the classes of seers. These classes are combination of the prophetic and imaginative. As you read, you have to distinctly identify where you belong.

The prophetic seers are divided into three while the imaginative seers can also be divided into three

The prophetic seers are

1. Seers of the word
2. Seers of vision
3. Seers for nations

1. ***SEERS OF THE WORD***

They are also referred to as seers of scripture. They don't see into the spirit realm but the scripture. Through the Holy Spirit, the scripture becomes a realm for them to access themselves.

Most of them don't see vision but they can understand clearly what is revealed in scriptures. They are also known as seers of scriptural revelation. The revelation of the scripture is reveal to them by the Holy Spirit.

These unique seers can see with their inner eyes dramas and events that took place as they read the scripture. They can visualize conversations on pages of the scripture and can easily relate it to the current as revealed by the Holy Spirit. Seers of the word are not just teachers of the word but prophetic personalities graced and endowed with the special ability to see clearly in scripture what is not visible to common readers.

While a teacher is logical, reasonable and analytical, a seer of the word is prophetic, inspirational, and anointed to bring the picture he has capture from the scripture into the mind of the reader or listener. A seer of the word doesn't attempt to make you know but see. When he or she also read the scripture, the attempt is not to know what is written but to see what is revealed.

All seers of scriptures can look at what is happening in the world today and get into scriptures to find out where such has happened in the scriptures and how solutions were provided to problems in scriptural context. These rare individuals are not attempting to be doctrinal but are mainly focusing on being revelatory.

One grace that is common or associated with these unique people is teaching. Although, it is not all of them that can teach but 90% to 95% of them can teach what is revealed to them. Like I said earlier, they may not see into the spirit realm but the can clearly see into the scripture realm. Every time you get into reading or meditation of scripture and you begin to receive applied knowledge in your heart concerning a word, event or

verse in scripture, you are in the scripture realm.

How we need seers today like never before. In a time and season that people think they are the first to experience what they are going through, we need seers who will show people that whatever they are going through has happened in the scripture to some people.

All apostles and teachers should be seers of the word. Apostles and teachers are endowed with special grace to see into the things hidden from others in scripture. In other words, they are endowed with special ability to understand the scripture in an applied form to situations and circumstances of life.

When problems loom, we need seers that can get answers and solutions out of scripture that can be applied. The scripture is full of answers and solution, but until it is revealed to you, you cannot see it. The seer of the word will see different ways through which certain issues like barrenness, sicknesses, poverty, disorder can be dealt with. They don't come with common sense but revealed sense they got from scripture.

All believers in Christ should be seers of God's word. That is the reason I said you are a seer. As long as you have the Spirit of God within your heart, He will always reveal to you what He inspired men to write in Scripture. With the Holy Spirit within you, you can see the scripture for He is the revealer of the secrets in scriptures. To see the scripture is to understand the scripture. The moment you are able to understand the scripture; you have seen it. Understanding the scripture is seeing the scripture.

You don't understand or see the scripture by reading or meditating. You get understanding or see the scripture because the Holy Spirit supplied light to your heart while reading or meditating. It is not reading that makes you see it; it is revealing (supplied by the Holy Spirit) that makes you see.

All pastors – preachers and teachers – should be seers of scripture. How can you get others to see it when you haven't seen it yourself? It is what He makes you see that you can make others to see. God doesn't just want us to know the scripture, He wants us to understand (see) it.

To be a seer of the word, you should always pray to God to open your eyes to see what He is showing to you in scripture. Do you remember that Paul prayed that the eyes of the understanding of the Ephesians should be opened? The fact is that when your eyes of understanding is opened, you will clearly see what is written in scripture. As a believer, you should be a seer of the word. I pray that your eyes of understanding will be opened to comprehend what God is saying to you in Jesus' name.

2. SEERS OF VISION

They see open visions majorly. This is the only kind of seer that people understand. Only few know about the seer of the word. Every child of God should be a seer of the word but not all are seers of vision. Those who see with their inner eye are seers of vision.

Seers of vision will always have open vision. Vision here doesn't refer to mental picture but supernatural vision. I wrote a book on *Supernatural Vision*, you may do well do read it. Everybody can have mental picture but not everyone will have open vision. Open vision is granted to those who have been endowed to receive messages through the channel of sight.

3. SEERS FOR NATION

These are those who see for a nation, region or place. They have gained stature to see event that will occur in a nation. Their visual sight is to see ahead events that are likely to take place

in a nation. These are rare people that can tell the mind of God accurately for a nation based on what God has shown them.

The imaginative seers are

1. Seers for organization
2. Seers for the family or home
3. Seers of events

1. *SEER OF YOUR ORGANIZATION*

No organization or company can come into existence without a seer. Somebody has to see it before it comes into existence. Every workplace or corporation was what somebody saw. Everywhere people gather to work is an outflow from a seer.

Every great organization was once a picture in the imagination of someone. Your ability to capture an image of something that can come into existence makes you an imaginative seer. All founders, pioneers and leaders fall into this category.

While everyone will see how an organization or company has been, the leader should always see how it can be. Big vision is the beginning of building a big organization. An organization may be small today but if the vision is big enough in the heart of the leader, sooner or later, the organization will become big.

1. *THE SEER OF THE FAMILY OR HOME*

How do you see your home? What kind of home, family do you

desire to see? What do you want your spouse to be? What kind of children do you want to produce? What you see determines what you do. If you see your family or home as a place where visitors, mentees or friends will always love to be or come around, then, that will influence the manner of your communication, how you build your house or the kind of apartment to get.

Do you want your children to be musically oriented and skilled? If this is what you see, it means you will send them to music school and get them musical instrument. If you see them as scholars, fix them into a tutorial or class. You can't get a gift or talent for your children but you can get them skill.

Your home or family is a reflection of your vision. When I come across your children, I can predict the kind of vision you have for them. The vision you have for your children determines the training you will give them. Whether you like it or not, you must always imagine the kind of home and atmosphere you want to create for your family before you see it happen. What we see in your home reflect images in your heart. Anytime you want to change the atmosphere and setting in your home, you should first change your vision.

1. *SEERS OF EVENTS*

These are people whose imaginative capacity are very strong. They always see things and matters differently from others. They see words as pictures in them. They majorly dwell on imagination. They see things from God's perspective. They see events, matters, and places the way God see them. They easily see the other side of things within them.

To be sincere, you don't need the Holy Spirit to do this but

the Holy Spirit can help you faster. In this aspect, most mentor fall into this category. They see things inside of them before inventing it. Builders also fall into this kind. The powerbase of this seer is imagination. They see what others don't see. They can read action on face and tell what's in your heart.

Every organization that wants to grow needs these kind of people. Every ministry that have these people will always flourish. This people easily make it in life not because there is a special grace upon them, but because they can see further and better than others. Having this kind of people as a leader of organization, ministry, sector, nation is a wonderful thing. This will enhance their leadership capacity and enhance how they receive vision, communication and utilize it.

Seeing things differently is not doing it differently. Most of these seers are not doers. They only talk what they see in their imagination but they never take action to see its execution. I have found that most of this people don't have communication skills, so, they need to learn and develop communication for the purpose of sharing their perspective accurately.

For an organization to grow, the leadership should be skilled to identify the seer in the organization. They can be unbelievers or worldly people who fail to acknowledge the existence of God in the universe but they have this unique ability of insight that empowers them to be natural seers.

You need them, because they can easily discern problem, detect fault and also see the possible solution to the problem. As I said earlier, some of these people will only talk, when it's time to act, you won't see them. Often times, they are the ineffective in execution in the organization. You must be careful not to permit their ineffectiveness at execution to affect you from giving special attention to their perception. They will help the

organization or a person see what they need to see. They don't have to be Christian, even most of the people who operate this aspect are sometimes not Christians. They don't attribute their ability to God but to their innate birth.

One of the attributes of these people is that they expose their mind to secular concept, creativity and ideas. They have different model and image inside them which they saw somewhere else. They are warehouses of models and images. Models and images here mean what they saw other companies or organizations do. They have such observation and assimilation capacity in them.

As a leader, look for this kind of people, build relationships with them and always listen to them. Don't be a fool to always do the talking. They should be the one talking. Listen to them, ask them questions, make them comfortable around you. Give them the privilege to think about the way forward or solution to a problem. They are thinkers. Every think tank falls here. They are strongly mentally in nature. These are people that fit strategic planning. They are effective in the planning of event, programs and organization structures among others. They may not be spiritual but they are strategic. Their minds function effectively different from the way things are and how they should be.

All poets and prose writers are seers. They see something and code it into poems or stories. They use nature to interpret nature. They don't have the Holy Spirit but by their imagination, they see the unseen realm. Some of them go to reserve areas, quiet vicinity to access the exotic world with their mind.

Everyone who desires to be this kind of seer should do what these seers do. You must give yourself to deliberate and strategic thinking. You must expose your mind to different models and images of other people's organization and begin to seek how

you can apply what you saw to your situation or organization. These seers often isolate themselves from the public to a silent atmosphere where they can derive inspiration and see the unseen

A seer of this type will surely need help in other areas of life. They may not know how to start a vision, how to continue it but all these things can be learnt when they humble themselves enough to be taught. The fact that you see things differently doesn't mean you know better than everybody around you. If you assume such, you are a great fool to yourself and others.

SEEING THINGS AND KNOWING THINGS

There is difference between seeing things and knowing things. Often, these people (seers of event) only see things but they don't know things. Knowing is deeper than seeing. If you want to grow higher in life, you need the knowledge of other people, and then begin to apply your sight to what you have gotten from others. Be careful not to brag that you see better than others or see things differently or bigger than others. Doing this will do you much harm – it will resign you to a state of loneliness. People will not want to listen to you again. Nobody wants to associate with a boaster. When you brag, you are actually terminating your role in life. Be wise in your speech. Be skilled and humble with your usage of words.

You've got to avoid statement that reveals superiority complex. It will crimp your influence, stagnate the impact of your role and terminate your duty.

How do you develop this ability? You begin to identify problem in an organization, your life and get the solution. Solution is not needed when problem is not discovered, so discover something.

YOU MUST BE PROGRESS DRIVEN

Think about the problem of people and discuss your discovery and suggestion. You must always seek something to change for improvement sake wherever you are. Complacency must be your enemy. Hate it with passion. You must endeavor to always see something to change wherever you are. You can't see changes when you don't want to change. You are not expected to have a change you don't desire. Everywhere and every time you see change, improvement, progress in a place, it's because somebody or some people desire it. Things don't just happen, somebody or some people are responsible for it. The truth is that someone must desire progress.

The role of a seer is to see what is needed to be done. Don't be myopic, see bigger and do bigger. You don't compare yourself to bigger people or organizations. You should only observe those bigger than you to learn from them. You can find out what they do that you don't do. Then do the same. If you want to be big, do big things. If you want to be bigger, do bigger things.

Every counselor must be this kind of seer, why are you a counselor when you don't see things right. Your duty is to admonish, instruct people to do something they don't see but is very clear in their mind. You see such because of your education, experience, exposure, knowledge and inspiration.

Every mentor should be this kind of seer. You must see potentials yet discovered in your mentees. See ahead of them and guide them. You should discern their capacity and flow with them. You must always see something they don't see about themselves. You must see their gifts. Some don't know they have certain gift because it has not manifested in them, yet they have it. It has to be discovered by you. Your duty is to inform them ahead, so when it manifests in them they can know it.

Seers of this category easily see strength and weakness. Every man is strong in one or some area of life and at same time weak in another area of life. Don't think you have strength everywhere. Seers can discover the weakness or strength and can help to improve it if they put their mind to work. These seers must be taught that he or she can't see everything. You can't be an island; others will see what you don't see. So, learn to get the perspective of others.

OPEN YOURSELF UP FOR HELP

The Holy Spirit can help a man in this area. He can show you what others don't see. He can direct you and show you the deepest secret. While others are thinking for hours, days on how to see and do things right, you just get it inspirationally.

One of the reasons the church has many poverty-stricken personalities is because we don't train Christians to be imaginative seer. We don't teach our people to use their mind to be creative and see things differently. Years after years, they maintain the same status. They do same things, same way over the years. Wealth and riches respond to change and creativity. But many believers act and live routinely without focused intentions.

THE RISING OF SEER OF EVENTS

Church leaders need to empower believers to be seers of events. Over the years, we have concentrated on seers of visions but haven't taken imaginative thinking seriously. We must teach our people to see progress always and see increase. How do you see? You can see inwardly clearly through thinking and imagination. How you activate your imagination is to get into thinking? When you think, you will see. Thinking makes imaginative seers!

HOW DO YOU OPEN YOUR INNER EYE!

The good news is that everybody has a mind to think and we can all think except those who are sick in mind. It's time for believers to start thinking – and as you think, you will see. You can't see how things should be until you get yourself thinking. God may not inspire you to think but He will inspire you when you think. You must open your inner eye to see. How do you open your inner eye to see?

Firstly, you must know your inner eye is your imagination. So you open your inner eye (imagination) when you begin to think. When you think, you don't see words or letters, you see pictures. Often, people have heard the statement “imagine yourself doing this or that” but they don't understand the meaning of the word imagine. Some have thought, to imagine is to picture and they don't get the picture eventually. The cause of this is because they don't know how to activate imagination. To imagine is to picture something, but you can't imagine when you don't think.

There is nothing wrong with thinking. What is wrong with thinking is when you permit thinking to control you. God's order is that man should control his thought. Everyman can control his thought and you are responsible for your thinking. I discover that why people don't think is because they have no desire. Every productive thought is a product of desire. Your desire generates your thinking. When you don't have a desire you can't regulate and channel your thought.

My concern is that worldly people have desires but believers don't have great desires. Believers are used to referring to negative things such as ***I don't desire lust, I don't desire immorality.*** Check your desire if they are right. However, all these are good but you can desire success, greatness, riches, honor, health among others. Believers are complacent. They don't desire big

things. Refuse to be small, limited and poor – refuse to be poor, desire riches. God wants us to be rich. Some said when you desire it, it can make you to do evil or commit evil but this is wrong, a person doesn't do evil because he wants to. A person does evil not because of his desires but his decision.

Whatever you want to become or you become is not only a product of your desire but your decision. You do evil because you decided to, not because you desire to do it. What is your desire? Know what you want do. If you want honor, riches, fame, health, and influence, I want you to know that you can get it. Choose the one you want, know it within you then you begin to think about it. Your desire will attract to you how to get what you want through your imagination.

YOU ARE THE SEER OF YOUR LIFE

You are the seer of your life. God gave you your inner eye to imagine how your life should be. Whatever you do in the physical should be a replay of what you have visualized in your inner eyes. It is frustrating when someone's life is retrogressing or stagnating while others around him or her move to various levels of accomplishment. Struggling for accomplishments can frustrate the life of a person. Most people move around seeking a seer who sees into the supernatural to see for them. Well, I am not saying it's not good, but I believe you can see for yourself. With your mind, you can analyze what is working and what is not working in your life. You should be able to point out areas of your life that are challenging and work on them.

The question is what do you see about your life? What vision do you have? Where do you see yourself in the next ten years? These are questions that give directions to you. It should be the practice of everyman to see himself differently. If you can

intentionally answer the questions above, it will help you. What do you always think about? What do you like doing? What trigger your strength in conversation? Politics, religion, science, e.t.c? Whatever it is, the moment you identify it, 50% of your direction is solved.

Whenever things are not working in your life, it means something is not in place – It is therefore your duty to discover that thing. As an individual, you should seek to know what you lack. What you lack is not what you don't have, but what you don't know.

BE EXCELLENT IN YOUR APPEARANCE

In the early days of my life, I knew I was not fashion oriented. I dress based on the dictate of my parents. But as I grow, I discover I could improve my appearance. So, I devised a means to study how fashion oriented people around me dress. I began to study them and found a way to adapt myself to their style of dressing. You may not have the intuition for dressing, but observation can become a channel through which you scale above your fashion limitation.

The fact is that there are friends who may be fashion driven than you are. I remember when I got admission to the tertiary institution, I met with people who were fashion guru. They understand colour combination and grand style for events and activities. I was not ashamed to submit to them to always help, and they willingly granted my request. If you are not married, you may need to seek people around you who are fashion oriented that can always guide you concerning dressing.

Apart from the fact that you have friends and spouse that can tell you, you also need to know that you are excellent. Observe the way you appear from the way others appear. You can always

meet up with the demand of the fashion of the world.

How you dress is a reflection of your inner eyes. If you imagine yourself better, you will dress better. The reason you are not excellent in dressing is because your experience and past dressing style is always recalled. But the moment you switched from your past experience of dressing style to your imagination, you will start dressing newly.

Your appearance is the first book people read about you. You must be skilled to imagine yourself dress the same way highly esteemed people dress. You may go on internet to search for different style of dressing that can recreate your appearance. The moment you begin to dress the way great people also dress, people will begin to see you as a great person. Yes, you should think the way great people think, but if you are only thinking the way great people think but failed to dress the way they dress, only you will know you are great, others won't know it. You must understand that you don't only talk to people with your mouth, you also talk to them through the way you dress or appear.

PUT YOUR VISION TO WORK

Vision keeps your mind busy. Ensure you get vision for your life. Another word for vision is idea. To say, ideas rule the world simply mean vision rules the world. Get an idea, then, put it to work. Only visionaries possess the future. If you can't envision the future from your present, you are lost into the future before the arrival of the future. The secret to making your vision work is that you must regularly see your vision moving, progressing and advancing in your imagination. Your vision was received through your inner eyes, so also, it will grow through your inner eyes.

Visions are like different buildings on a street of an estate.

The house is there but you need to enter the street to move into the building. How can you enter the reality of your vision when you failed to visit the street of your vision in your imagination regularly? Just as we have many dilapidated building across different places, so also we have dilapidated visions. One of the reasons a building becomes dilapidated is because nobody stays there. So, if you don't dwell in the visions in your imagination, it will eventually become dilapidated.

Let me paint this picture to you. God created the universe. He created the heavens and earth. However, it must be noted that God concentrated on beautifying the heavens with wonderful creatures and left the earth just as it was while it was created. But there was a characteristic displayed by God. Do you remember that the scripture records that the Spirit of God moves over the surface of the water – on earth. That clearly reveals to us that after God created the heavens and earth – He already envisioned how He wanted the earth to be, but wasn't ready to concentrate on it. While we knew that God didn't bother to continue the work of creation on earth, yet, He didn't abandon the earth. He was always visiting and moving on earth – moving on the face of the waters.

Whatever vision you have will continue growing in you as long as you move on it regularly. Whatever vision you cannot move in your heart, you cannot move on earth. As a seer, you must consistently see the updated version of your vision. A seer will always see whenever he opens his imagination. When you imagine your vision, you must not see it the way you envisioned it yesterday, you must see a newer version and updated version of it. The vision in your imagination will not be bigger in the beginning, but as you continue to see and re-imagine it, it will keep growing bigger and bigger.

To make your vision work, always identify the things you need to do next. Until you know what to do, you cannot make your vision work. Counselors are not your seers; they are your strategists. They are to give you the guideline and execution model for the implementation of what you have seen.

BE EXCELLENCE DRIVEN

You should be cultured by excellence. It must not be occasional but regularly – make excellence your lifestyle. Excellence reflects the quality of your personality. It brands your identity and duty. Everyone loves to be around excellence. Excellence attracts quality and quantity.

You've got to be excellent in speech – work on your pronunciation of words and grammatical expression. Dare to be different! You don't wait for someone to tell you that your vocabulary is not correct. Some written expression is very disgusting to the mind – such is saturated with wrong expression, wrong spelling among others. People will see this, but will not tell you. The best way to work on this is to read books by distinct writers and expose your mind to dictionary.

Everyman should be a seer of his life. You must see yourself becoming a personality, having unique staff and doing things beyond your current status. What you don't see about you, you can't be or do. Whatever you see about yourself is what will be registered in your sub consciousness and that will always influence your decision and action. Many folks are highly ignorant that everything about them is always attributed to be God's responsibility. God must speak to them before they get a job, go to school, eat breakfast, visit their friends, be creative among others but they won't listen to God before they have

intercourse with their spouse – very funny. Common, use your imagination because you are the seer of your life.

DON'T CLOSE YOUR EYES WHEN GOD IS SHOWING YOU WHO TO MARRY

Some guys are still praying to God to show them their spouse when God is saying open your inner eye and see. They still close their eye when God is showing them someone. Some ladies still go about visiting pastors and prophets to see their husband for them. It is time to get out of this shackle of ignorance and religion. You like someone and you already see that both of you can work out things, why still praying to God? Go ahead with the person, apply your faith, get enlightened about marriage and do your wedding.

Your faith and knowledge acquired on marriage can't fail you. Why most men failed is not lack of faith but lack knowledge of handling issue. Matter will always arise but unity, love and maturity through knowledge (marital education) acquired will save you. If you love that lady and you have a clear conscience, peace within you, then go ahead and marry her.

God created you to be a seer. He gave you your mind to observe and analyze all your analysis. He connected people around you to you. God has surrounded you with people that can help and counsel you. Boldly step out to get the experience of those that have gone ahead of you. If you are praying for marriage, I counsel you to fix your mind on the image and personality coming to your heart.

If you have an imagination, you are a seer. It means you can see things within you. You can see things differently from the way other perceives it. Images form in your mind when you

allow it to dominate you. Every great thing (building, product, brand, organization) you see in our world today was once a silent thought in the mind of someone. That person could have discarded such idea that came through thought, but such chose to dwell on it and it produces something great we see today.

THOUGHTS VERSUS THINKING

There is a clear difference between thought and thinking. Thoughts are millions of ideas or streams of ideas that flow through your mind. But thinking is your concentration on a particular thought (idea). Thought flows to your mind, thinking is the concentration of your mind on a thought that flows to your mind. Everyone has thought but not everyone gets to think on the thought (ideas that flow to mind). Without thinking, thought is useless.

There is power in thinking. Millions of what to do can flow through your mind, but thinking will set your priority. Therefore, as you receive your thoughts, think about it. Thinking set the paths and method for accomplishment. The thoughts that flow through your mind daily inform you about *what* to do, but thinking initiates *how* to do it. There is nothing wrong with thinking, but you should avoid thinking on the wrong thought. You should concentrate your mind on an idea(s) that will add to your productivity, relevance and think about how to get it done. As you think it, it become clearer and real you.

Every image in your life is elastic in nature. The more you

think it, the more it expands. Paul admonished the Philippians to think on good, pure, holy, among other things. Thinking has capacity to inspire or discourage you. When you think about your failure, you will be discouraged. But when you think about new things you can do, people you can connect with, what to do to help others, then you will be inspired. Don't get yourself thinking on your failure, do fix your mind on the next thing you want to do. Don't use your thinking to wish to do something or think things that you know are not realistic or unimaginable to you. You should think about your vision and your contribution to the lives of others around you. Doing this, you will see your capacity the more.

You begin to see yourself in a new way when you think about what you can do, what you can do next or what you need to do next. Most people waste their time thinking on their personality, how people praise and honor them, how to discipline the subordinate under them among others. Your time is the eternal treasure given to you and it must be managed well. Never you think about what people do to you – positive or negative. You will keep progressing and advancing in life when you think about the new things you can do; the new things you can have or get. This is what guarantees your progress in life.

Which is powerful between your thoughts and your thinking? It is thinking. Whatever you think on is more powerful than what come to you. You must know that whatever you think on was once a thought inside of you. We lack innovation today because we don't think. And many who think concentrate on wrong thought. Every idea came through thoughts. Thoughts is idea in words while imagination is an idea in pictures. When we think, we will generate the capacity to bring our idea into reality. The fact is that anything initiated or innovated is not a product

of thoughts alone but a product of thinking. According to the law of effect, you are not permitted to bring to pass whatever you have not devoted your mind to thinking about. Whatever you are doing or what to do is rooted in your thinking.

I am amazed when I listen to motivational speakers emphasize one aspect which is to get an idea. They just motivate people to get an idea or a concept which is good, but thinking about it in order to find out the method or strategy to accomplish is essential. It must be your habit that whenever you get an idea, you must think about it. Thinking get the idea into you and this alert your sensitivity to identify the (how) when it comes.

Receiving or thinking about an idea do not get things done. You must decide to do it. Forces (human, esoteric) can affect your desire. That someone told you to do something and you did it doesn't mean they influence your decision. You can as well reject doing it. You did it not because you are told but because you decided to do it.

INCREASE YOUR THINKING CAPACITY

As a seer of life and events, it's essential you increase your insight capacity. When I mean insight capacity, I refer to your thinking strength. Your thinking capacity will definitely increase if you are able to get the perspective of other people. You should see everyone around you as seers who can share things with you the way they see it.

If you want to do great things, do what great people are doing. If you want to see great things, then see what great people have seen. How do you see what great people have seen? Watch them, listen to them and read their books. God gave you your optical eyes to see what others have done. But He gave your inner eyes to imagine what you can do. Your inner eyes are to imagine the

best way to do what others have done. Those who use their inner eyes don't copy what others have done, they use their inner eyes to picture how they can advance what others have done.

IMAGINATION: YOUR INNER MIRROR

You can't see your face with your optical eyes directly. You can only see your face through a mirror or any reflective object. Your imagination is your inner mirror with which you can see how things can be and how the future can be. Your imagination is a mirror that can show you your future. Every other mirror apart from imagination can only show you the present, it can't show you the future. God designed your imagination with the capacity to bring the future into your present. Your future shouldn't be in years ahead; it should be in your imagination.

Your imagination is the powerful force designed for your progress and expansion. The word *image* can be gotten from imagination. Imagination is the world of images in a man. Whatever you want to see physically, you can imagine it. Every picturesque building in our world today was once a picture in the mind of someone.

Every great thing you see in the world was first great in the imagination of someone. Every success in the world was first a success in the imagination of someone. All inventions are products of some people's imagination. All inventors were seers

of whatever they invented. You can't see it and not invent it. The way you receive things from the invisible into the visible is through your imagination.

WHERE IS IMAGINATION

A clear understanding of the division of man has helped to grasp the divisional function of man as a corporate entity having three units.

The division of man are spirit, soul, and body. But, the charismatic preachers have taught that man is a spirit who has a soul and live in the body. The focus of this discourse is not to clarify this. But I want us to know that such insight is not accurate. I perceive that was preached for people to understand they have to function from their spirit.

We have different parts of the body and also sub division. One of the different parts is the spirit of man. However, the focus shall be on the human soul so you can identify the imagination. ***Imagination is in the soul.***

DIVISION OF THE SOUL

The soul is divided into three hemispheres

1. Mind
2. Emotion
3. Will

Some identified the mind as the domicile of intellect, emotion as the domicile of feeling while will as the domicile of decision. These are all correct but not complete.

DIVISION OF THE MIND

The mind is more intellectual. The mind is also divided into three which are

1. Intellect.
2. Imagination.
3. Memory.

Some have taught that the mind in psychology is the brain in physiology. There is no usage of the word “**brain**” in the Bible but we have the word “**mind**” Jesus even said love the Lord with all your heart and all mind. When He said all your mind, he referred to your intellect, imagination and memory.

There is a confusion of the location of the mind in the human body. Some point to have chest, some said it could be the stomach, other said between the stomach and chest. But all this are not correct. Where is your brain? In your head? if yes, that is where your mind is located. The brain in physiology is in your head also the mind in psychology is in your head. I used to think that brain and mind means the same thing until I learned they are not the same. You can treat the brain medically but the mind cannot be treated medically. An injection may affect the brain but cannot affect the mind. Science will prove to us that our brain comprises of cell, bones, blood, and neuron among others. But psychology doesn't identify such.

While science relates the function of the brain to the living and existence of man, psychology relate the function of the mind for the living and progress of man. So, the statement use your brain is the same as use your mind. It's just that the details of medical field (physiology) are different from that of psychology but both are needed.

From the study, we now see that the mind refers to three components:

Intellect

This is the seat of reasoning. This is where you carry out your thinking. You generate ideas from this place. This sends information to the imagination and the memory. Words are the element here, it flows like thought.

Imagination

This is the seat of visualization and creativity. You can create things here. This is where insight dwells. Pictures are the elements in imagination. You can generate pictures yourself or you receive it. Sometimes when your eye sees a picture physically in our world, a signal is sent instantly into your memory. That is why you can close your eye and still recall what you saw outside you. Your imagination can receive word from the intellect but will turn it into picture. Pictures are in the imagination and whatever gets out of your imagination can still be recalled.

Memory

This is the seat of storage. It doesn't store every information that comes to you. Some have said it stores everything. That is not true! The reason is because over two millions thoughts run through every man in 60 seconds. Your mind can only lay hold on one or two idea in 60 seconds. Your memory stores everything that has been processed in your intellect and imagination. Some said, sometimes, your eye can capture something and it sticks to your memory straight without passing your imagination. It's very wrong. Whatever your imagination has not captured, your memory can not produce. The memory of man is over six billion gigabytes. Your memory has more image than you imagine. That is why you have to fill your memory with

right and positive words and pictures.

It's what you put in your memory that it will produce. It's very easy to get information store to your memory but it takes time before you get it out. Some young folks often see the nakedness of people when they close their eye to pray. But that's what in their memory, although I understand that the devil flashes picture in the heart sometimes, yet I maintain that they get themselves into their trouble by visualizing the wrong thing. When you watch pornography, you are indirectly installing a picture in your memory. With time, your memory will produce that picture for you anytime. That's the reason you must be careful of what you watch.

IMAGINATION IS NOT A GIFT

Now, we know where our imagination is, it's in our mind. We are created by God to always see things inwardly. God made every man a seer in a capacity. He expects us to see our world, reflect how we want our world to be like and bring it out.

Have you heard someone say 'I don't have the gift of imagination?' That is funny. Imagination is not a gift; it is an organ you are created within you. Some even said "their imagination is not so strong" they, therefore, acknowledged the imagination of others or the effective seers around them. Imagination is not a gift, but an organ created within your mind.

Everyman is created with imagination. The problem is only few are using it. Your imagination is your creative world. If you don't know how to imagine, how to see things from different perspective, how to imagine things the way it should be, then, you are not using what God gave you. If imagination is a gift, then everyone is gifted with imagination.

You can't create something if you don't know how to use your

imagination. God design it that whatsoever you want to see outwardly should be seen inwardly first. There is poverty in the imagination of many people. What do I mean? They don't have image of what can be drawn upon to create something. Whenever you think, you have put your imagination to work. God has made you a designer and builder. You design and build everything you desire and decided through your imagination.

All imagination is the same in frame and structure but different in function. There's no imagination that is stronger than others. What makes it stronger is how we use it. How do you use your imagination? The imagination you use to picture strategy of seducing a lady is the same imagination another man will use to make billions of dollars. The fact that you have imagination makes you a seer and all you need to do is to use it.

WHAT MAKES A SEER

What makes a seer is insight. Insight here refers to the ability to see what is not obvious to the physical mind. There is illumination (light) inside every man. God so endowed us with the ability to have insight into different world. Your physical eye is created for sight and to see physical things in the real world, while your insight (inner eye) is given to see things in the unseen world. We are all created with both sight and insight so we relate and function in both the seen and unseen world.

The greatest blindness is inability to see the unseen. There are many blind folks on the street, though they are blind, yet they can see the unseen. If you tell a blind man to picture a tall man with white clothes, they can actually do, but they can't see physically. Their blindness is just a physical deformity but it's obvious that they can't see things or images on the inside of them.

There are categories of people who have never seen in their lives- such were born blind and they were like that for years. These people can actually see images inside of them but they can't state precisely what physical images are. They lack the ability to state or describe how man looks like since they have not seen man in their life. So, such can have the picture of animals like man and have the picture of man like animals.

A man can be blind on the outside but see clearly on the inside Paul the Apostle, after his encounter on the road of Damascus was recorded to be blind but God said to Ananais that he (Paul) had seen a man named Ananais come to him and prayed for him in his vision. You see that Paul was blind physically but he saw a vision on the inside. Blindness is not the absence of light alone but absence of vision. The question is how can you receive vision or be a seer without the Holy Spirit? You may say, how can you say everyone is a seer? That is the fact. As long as you have your inner eyes, you are qualified to be a seer.

I admonish you to diligently and patiently read further. I trust that this study will bring about the restoration of seeing capacity to the world. The sincere fact is that in the New Testament all should be seers because we have the technology that power insight in a unique way. I tell you, if a non-christian read and devour the insight here, such will go and grow wild in vision. I hope you realize that Paul saw vision before he was prayed for, get baptized and got his sight back. Someone once said that blindness is not loss of sight but lack of insight.

Something extraordinary captivated me sometimes ago. I saw this in the scripture, a blind man came to Jesus, He (Jesus) took him out of the town, ministered to him and asked him whether he could see. The man said he saw tree as men. The question is that how did he know man differently from trees? It means

he had insight about the image of man but didn't not have the sight of them before or he lost his eyes at some point for some reasons not known. What I learnt from this man is that you may not have seen something before but just have a perception of it. You have to know the name of the things and have insight or what they look like so that when you see them you can identify them. You notice that man doesn't have sight but he has insight on what things look like.

So, sad that many people including God's children only familiarize themselves with the seen - the physical cosmos. Everything around them and everything about them is only a function of their two optical eyes. God created us to see the unseen. He granted us access to the realm unseen. You can't do something bigger if you don't use your invisible eyes. We are made doers. You have to be a seer before you be a doer; to always do something in a new way or do new things, you can't keep doing the same thing, same way over and over again. You have to change style and model of doing things.

Often, God's children prophesied things but don't see the results. The assumption is that prophecy will fix things, get things done. But the role of prophecy is to help them see what God want them to do and where He wants them to be. If you prophesy *I am growing higher, I am going higher, I am exalted, I am a success* and so on. All these will only happens when you see yourself higher, exalted, and as a success. If you said you are a success, my question is what are doing now to succeed in your endeavors? You can't succeed if you are not doing something or you don't plan to do something. Success respond to something you are doing or intend to do. Everyone can't see the invisible because they are not using their imagination.

MENTAL VISION: THE SEER POWER

Vision is the mental picture of the great future you desire. It is an architectural concept of vision that makes a seer. I remember God laid a word in my heart sometimes ago that goes thus “***the vision of your heart is your future on earth.***”

Vision is the ability to see into unseen. It transcends the nature and physical world where material, resources and beings are seen in their real state. Vision is on two sides – natural and supernatural. It can be natural or supernatural. Man, devil and God are in charge of the natural vision. Just as God can give supernatural vision, the devil also can give vision.

The natural vision functions in the imagination of man. God can paint picture in your heart, the devil can also paint a picture in your heart too. Man on the other end can generate picture from this thinking. Whenever a man does not know what to do, he lacks vision and direction for his life. The supernatural vision is pictures and videos that comes or flow in man without his contribution or coordination. If it is supernatural vision, it will need the aid of a spirit to make it happen – either God’s Spirit or demonic spirits.

Natural vision comes to you in thought and pictures in your mind. Vision positions you for the next level of your life. It causes you to see beyond your limit, circumstances and environment. Your vision is your future. Every glorious future is a combination of different visions. No vision, no action. And when there is no action, there is no future. When you don’t have vision, you can’t make decision because you only decide to do something when you only know what to do.

However, to further simplify it, vision is the idea inside of you – great things and successes were once conceived as an idea in the past. Your profession, business, ministry, organization,

marriage was once an idea inside of you. Whenever you have an idea to do something, you already have a vision.

Vision creates your world for you. The devil can give you a vision but sure the vision is always evil. Even when the devil gives you a vision, you still have to take decision whether you take it or not. Never concentrate your mind on negative thought or pictures. Let's assume that it occurs to you to seek the fall of a leader. This is a vision but you must know that God can't give you such as a mental picture. You have to discard such and never give your thinking to such because when you think about it, you will see reasons for doing such and generate how to do such.

Learn to only concentrate your mind on positive things. How to get vision for your life is to always ask yourself, what can I do next? Only those who have the next level mentality are guaranteed vision.

If you can get a vision, see yourself becoming a type of person and doing something, then you are using the seer's capacity to get vision for your life. How do you see your business? What's the strategic business plan you have? Wishes and desire makes a man sleeps while vision makes a man alive. Everyone must think about something to do, see it within you and step out to do it. If you have done something before, you can still do something new or more. Life becomes boring when there is no vision.

A man of vision starts with what he has and where he is. You must have a global vision but there's no man that started globally. You think globally but start locally. You will get the momentum as you continue and progress with vision. Every vision a man receive is inform of a seed. You plant the seed as you start the vision, you water it by being consistent. As you do this, watch how it will grow to become a big tree. There is no

vision that suddenly become bigger but wisdom and consistency make a vision bigger.

Your vision will expand and become bigger as you continue doing the needful. I remember having a vision to start ministry, so I started out by organizing a program which I expected multitude of people but only seventeen people came. Others didn't show up after I have sent a lot of message and invitation to them. But I was consistent, I continued and was not discourage. I remember I organized three days meetings expecting people to come but only seven people attended the meeting. I was still not discouraged but today, when I call for meetings, even those I don't know attend such. So, you see the force of wisdom and consistency. Oral Robert said, when we see the invisible, we will do the impossible.

SYNCHRONIZE YOUR SPEECH AND INSIGHT

When speaking synchronizes with seeing, believing gets easy and you command results. Speak out what you see within. This must be the habit of every child of God. You are a seer; you are also a speaker. God also expects you declare what you see within you. Seeing things within you doesn't get things done alone, you must keep saying it. The more you declare it, the more the capacity to believe rises on your inside. You can easily resist everything that wants to hinder you from accomplishing it through your words. God spoke things as though they can hear because He knew all things He created has the intelligence to hear.

Every seer is prophetic; therefore, you must release declarative words out of your mouth about what you are seeing. Don't just see things and keep quiet, you've got to say it out. Boldly declare it as though it is time for manifestation. For example, if

you see yourself building a school or you have vision to start a school, then move from the seeing realm to the speaking realm. Speak what you have seen it. Boldly say words like I set out by faith to build this school, nothing can stop and hinder me. You can continue to declare this *“This school is established (mention the name of the school), you are filled with pupils. This school is known everywhere. This school make global impact in the lives of the pupil. You are a reference for success, known for academic excellence and exploit. We produce leaders, scholars, great men.”* Doing this will make you to be conscious of your vision all the time. Some people think speaking this way is physiological. They assume that we are trying to use affirmation to establish our faith which may not change our belief system. Such people need to understand that affirmation establish our faith into our belief system. The fact is that until you change what you think and talk, your belief system cannot change.

FRESH INSIGHT

You may not need to make bold declaration when you have the capacity to get what you see. You don't need declaration or to build your faith to get things done when the resources to get it done is on ground. For instance, if you see yourself buying a kind of car or house and you have the money to purchase it immediately, do you need any declaration? No! This is because you have the resources to get what you desire. You only make declaration in such instance to resist spiritual forces that may want to hinder you or attack you.

When you have a vision to do something but lack the resources to get it done, then, you need to keep declaring and taking action until you see it done. Your declaration will build faith inside of you to step out boldly in faith. When you want to start out

a vision bigger than you, you need faith to courageously step out and don't get discouraged. Do you see yourself doing an unimaginable business? Then begin to declare it and launch out by faith to start it. You are a seer, a speaker and a doer. When you see, ensure you speak out. After saying it, launch out to do it. This positions you for exploit. The problem with many is that they remain at the level of speaking for long. They never see the need to move to the doing part. The order is to move from seeing to speaking and from speaking to doing.

Many seers or visionaries have not done anything with their vision just because they don't have resources to bring it to pass. The revelation that changes men is that the greatest resource you can ever have to accomplish a vision is your faith. Your faith will get things done if you trust God enough. When God gives you a vision and you can't get it done, it's not lack of money, people or resources that hinder it. The hindrance is lack of faith. You don't have the faith to get the work done. The God who gave you the vision knew that you don't have resources before he gave it to you, so, He expects you to trust Him to help you accomplish it. Why you lack faith is not because faith is absent or inaccessible but because you don't know how to get faith into your heart.

Whatever vision you have should be continually declared. Declare you are doing it, declare it done, nothing can stop it, all resources are received from God, amen. While declaring and after declaring, you've got to begin to see yourself instantly doing it. Get this, before your declaration, you see something you want to do. And after your declaration, you still need to see yourself doing it. How do you activate your faith after declaration? It's very simple! Simply fix the day or date you want to start or launch the vision. If it's a program, fix a date

for it. If it's your business, set the day you will start. If it's an organization or company, fix a date for a meeting. You may not yet know the people, but the moment you set date, you will begin to recognize the people that must be involved in it.

When you fix the date, faith suddenly rises on the inside of you. Everything inside of you will begin to process the fact and details towards the date. You must make a solid and firm decision that nothing on earth can change the date. You must avoid being discouraged because the resources are not on ground. Even when you cannot meet up with the plan two hours to the launch of the vision, still go ahead. Start with what you have and do not despise the days of little beginning.

Let me be sincere with you, the fact that God spoke to you clearly that He will be with you, support you and help you accomplish your vision doesn't mean that all your expectation and plan will work out once as you envisioned. Sometimes, you don't see what you expect before you start. Don't be discouraged, you need to get acquainted with how God speaks. When God speaks, He does not speak in correlation to human time. His word is a promise that transcends time - one day or year. You may not see the effect of that promise the day you start or after few months or years but you will definitely see it one day. Sometimes you might have forgotten the promise made to you before you start but God does it in a way to remind you of His promises to you. His word will never return to Him void.

LAUNCH OUT TO DO WHAT YOU SEE

You have seen it, then step out do it. Growth is bound to only respond to what you have started. When you don't start something, you don't get optimistic about growth. Endeavor to complete what you have created. The key to completion is

consistency. You can fail at doing something but it doesn't make you a failure. You are a failure not because you failed but because you accept failure.

Consistency of action is the key to overpower failing. When you fail, don't quit or stop. Find out what you need to do or a better way of doing what you want to do. As you make the move, great things will happen. Until you launch, you cannot come in contact with the blessings that have been reserved for you. If you don't take action to start what you see within your imagination, you may never know what is called prosperity.

YOU ARE THE SEER OF YOUR HOME

Many families are separated because there was no seer or there is a seer but he or she saw the wrong thing. Spouses must accept that they are the seer of their home. Regrettably, many couples see problem but they never work out the solutions. God didn't give you inner sight alone to see problems but to create solution. The solution is impressed in the heart of some but they failed to take action. Have you entered houses where everything is just scattered – no proper arrangements of chairs, wrong placement of objects – it is obvious the husband and wife lack creative power. If you want to have proper arrangements of your home, try to expose you mind to homes that are set in proper shape, see your home emit pleasant smell, use deodorant if needed. You must ensure the color compliments each other.

Always see excellence in your home and reflect it. See your children attending quality schools, acquiring the best education. Discover something that will improve the appearance and dressing of your husband or wife. See your family sending the poor to school, feeding the orphans, taking care of widows among others. See your family going on holiday trips and

enjoying family fun fair. It is expedient you understand that God will not tell you to do any of these because He has given you imaginative capacity to create it yourself. Whatever you don't imagine in your home is not licensed to stay there.

YOU CAN CREATE AN ATMOSPHERE OF PEACE

Create an atmosphere of peace. When you see peace within you for your home, you will generate wisdom to make it peaceful. How do you see peace? Think about it often and you will see yourself doing what will sustain the existence of peace. Every spouse should diligently develop the ability to detect problem in shadow and find out what to do to solve it before it manifests. See abundance in your home for by doing so, you will develop a financial plan for your family. It painful that many families have no financial plan, yet, they define abundance to flow like an overflow of water. Such is not magic, you need to work it out yourself and the working can't be done when seeing don't come first.

DISCOVER WHAT WILL HELP OTHERS

Influence and impact can be gotten through the use of your capacity as a seer. You easily influence and impact people when you discover something they are blind to about themselves. There are lots of areas that an individual will be blinded to. That is the plain truth. You need other people to see for you in some areas of life and also you need to see for people in some aspects of life.

Every potential is already in existence. Some are yet to be discovered while some have been discovered. Some people easily discover potential faster than the other. You can see what an individual doesn't see in his life. Whatever you discover in them

that they are blind to requires your help towards them. You are created to help someone today. Your inner sight will show you what help you can offer them.

The same principle you applied in your dealing with God is the same with men. The way is that you see something in people, tell them (communicate to them), afterward, do something to help them. Now, the case that is different is lack or poverty. When you see it, you only need to do something to help them. One of the ways to get influence faster in the kingdom is to help others – decide to offer a help today.

You must be quick to discern the help people need from you before they need it. Seeing it ahead will position you to know how to help them when they need it. You can't offer help you don't know that a person needs. Every time you help someone solve a problem in his or her life, you qualify yourself for favor in the life of that person.

PERSPECTIVE ABOUT PROBLEM AND CHALLENGES

What do you see about challenges of life? How do you see problem and confrontation? Defeat or victory? Whatever you see about yourself at any stage of your life really matter because it will eventually determine your response or reaction. When you see victory within you, boldness and courage will set in but when you see defeat, you are already defeated. David saw Goliath and boldness rose inside of him. It takes a giant to confront a giant. David was a dwarf on the outside but a giant on the inside. The key to victory is that you see yourself above all challenges and problems.

How do you see yourself above challenges? It's through two components - your thinking and talking. To be a victorious, you don't need to give your attention to thinking about what has

happened but what you can make happen. If you want to rise above the challenges of life, don't think about what life has done to you, rather think about what you can do to improve life.

Great men are not problem conscious but progress conscious. Whenever the unexpected happen, put your mind off it and concentrate on new things to do or your normal chores of life. Problems and challenges of life are to put pressure on us just to build us and to make us grow bigger. You are not ready for greatness when you are not prepared to stand against problem and challenges. The moment of growth is the time when you are in deep problem and challenges. If you focus your mind on the right thoughts, you will grow in wisdom, gather momentum and be strong. Regardless of whatever happens to you, think right, think straight and focus your attention on a vision, project not on problem. Why will you think about a problem that has already happened? Can you change it or reverse it?

There was a time the father of a young lady died, her father was all her hope. Her faith for success is built around the promise of her dad and now the father died. If she keeps thinking about the loss, desires can't bring back the father. Wisdom teaches her she should hold on her plans and focus - she should think on what she want to be or have and not give her mind to thinking about the loss of her dad. If she thinks right, the law of forceful attraction will draw breakthrough to her. Success responds to thinking, stagnation responds to your thinking. When you think about the next thing to do, you are setting the pace for progress to flow to your path in life. Always remember that David thought within him about conquering Goliath before he confronted Goliath.

SEERS OF SUPERNATURAL VISION

The discourse of this chapter is plainly an interface with the supernatural – that is, how people see into the unseen realm. The vision we are about to discuss is totally different from the kind of vision discussed in the above chapters. The vision explained in the above chapters refer to mental vision or mind-vision which can be gotten through idea and inspiration. It's an exploration of manifestation and adventure activated through thinking.

The focus of this chapter is on supernatural vision. I wrote a book titled Supernatural vision where I explained a lot about seeing into the unseen realm. You may do well to get the book. Let's explore insight into supernatural vision.

Supernatural vision refers to these three:

1. Night vision: This is the vision you have at night during your sleep. It is also referred to as dreams. Night dreams are night visions.
2. Open vision: This is a kind of vision that a person has when his or her eyes are either open or close when conscious. In

other words, the receiver of this vision is conscious of his environment and people around, yet, can see or interact with the invisible world. When a minister begins to see vision when ministering, such a person has open vision. Open vision comes in flashes of pictures and images.

3. Trance vision: There are lots of contradiction to this. This is a kind of vision you have when you suddenly become unconscious for a while in order to see into the unseen realm.

Every seer is a prophet but not all prophets are seers. The prophetic has two major streams which are:

1. The stream of words
2. The stream of sight

All prophets operate the stream of words but only few operate the stream of sight. There are prophets who only hear words but can't see things. The seer on the other hand can operate the stream of words and sight. Samuel was the first person to be called a seer in the bible, even though, seers have been in the Israel before Samuel.

In the New Testament, nobody was called a seer, yet many of the saints receive divine vision, they saw angels, beings, yet they were not called seers. The reason for such is because God want every of His children to operate in the two streams. The pipeline is accessible to all but only few are reaching out to it.

In the Old Testament, some specific people were regarded as seers who can receive or see supernatural vision for others. I hope you know that those who had supernatural vision in the Old Testament were called prophets. Those patriarchal prophets

saw visions but were not called seers because of the vision they saw.

ALL BELIEVERS CAN FLOW IN THE SEER REALM

God's plan is that every believer will develop the potential to see the spectacular. In your communion with the Lord, He flashes pictures and images that communicate His minds and intentions for us or others. Your ability to capture that makes you a seer. As long as you can receive visions from God, see things in the realm of the spirit and relate with it, you are in the seer realm.

The purpose of this book is to restore the seer ministry into the body of Christ not to be operated by some prophetic people alone but by all believers. The good news I have for you is that you can see vision. I mean spectacular vision. Do you realize that some people have been receiving spectacular vision but they don't know what they receive? It's time for spiritual blindness to vanish. God is ever ready to flood your eyes with supernatural vision like He did for the old saints.

The fact that some people in the Old Testament were not prophet or seer, yet saw visions is a sign that believers can have supernatural vision. Nebuchadnezzar was non - Jew and ungodly, yet he received supernatural vision. I hope you remember he saw the fourth man in the fire while others around him didn't see it. Since Nebuchadnezzar wasn't a prophet, yet, saw a vision of the fourth man, then, believers don't have to be prophets to see visions.

Belshazzar, the son of Nebuchadnezzar also saw a vision that none among his magicians could interpret except Daniel. The man didn't know God but God used vision to communicate to him that an end had come to his kingdom. It is fascinating to see

how God used supernatural vision – a stream of sight – to communicate to those who were not His. If God could communicate to the ungodly in the Old Testament through vision it therefore means God can communicate to non-Christians through vision in our days. I know some religious folks may want to argue this, just to defend God and to prove that God has nothing to do with the ungodly. But the truth remains that we as humans cannot cage God to a particular system neither does God need you to defend Him. He is God and does not change. If he did it with some people (ungodly ones) in the past, He can do it today.

To fully grasp and understand this reality that all believers can see supernatural vision is of great importance to our advancement in Christian faith and progress in life. Just imagine if God could relate with the ungodly through vision how much more His lovely children.

There was a time I thought about spiritists, necromancers, charmers, and other diabolical enchanters. They don't know God, yet, acknowledged what is not God as gods, what is their sources of power? How do they see the other word? I asked myself how they able to access the spirit world with less effort and stress? Do they actually see those vision or they are just deceiving people? These questions and more I pondered and asked myself non - verbally. As I make research to find out about the effect of these magical power, the veil suddenly disappeared from my eyes and my understanding was opened to the fact that two major components are responsible for all these diabolic accessibilities to the unseen realm.

The two components are interwoven in the sense that the first leads to the second and the second in turn leads to the first. These two inseparable components are the main sources of the vision seen by the magical guys. The two components are

acquired by the individuals who see vision. Such will only need to develop his skill over the time.

The two components are

1. Power
2. Knowledge

Power

Power in itself is not active until knowledge is applied. You can be given the power but without the knowledge, you cannot use it. On the other hand, you can have the knowledge but do not have power. So, it's obvious that both are interwoven, that is why they work alongside with each other. The magical and fetish seers understand this fact, so, what they do to transfer the capacity of a vision to a man is that they give such power to see and also gives the knowledge (education) and knowledge gives power.

The charmers teach their people the art and science of seeing into the unseen realm, but such education is lacking in the body of Christ. My concern is that those in the world understand that there is power behind the ability to see supernatural vision and a knowledge to flow with it, why are God's children ignorant?

I hope you realize that to the charmers, transference of power can make you a seer as long as your interest is there. Your kind of personality, background, religion, cultural scope do not matter, the only thing expected of you is your desire to have it and your response to the desire demanded. If you can desire it and ready to pay the sacrifice, then you will have it. How? You will be empowered and educated. They will transfer the power to you and give you the knowledge needed to effect it whenever you

need it. Obviously, as time pass by and you are consistent with the use of the power and knowledge given you, you will definitely become a great master of seer realm. You become proficient over time as you acquired skill and style. With this, you gather momentum and become an expert. The consistent and smart guy eventually become skilled than those who gave them. If those in the world – the ungodly can empower anyone to be a seer, even the blind, poor, how much more the living God. If you can hear God, then you can receive visions from Him.

In the past, I used to think it is only those who have the gift of vision that can see vision because that is what I learned from pastor, minister and people. I was told vision is a gift given to some particular individuals who have been enabled specially by God to see into the supernatural world. Have you been asked by ministers or an individual whether you have the gift of dream? Obviously some personalities are believed to have the gifts of dream or vision. When anyone has dreams or visions consistently, it is concluded that such has gift of dreams or vision. I grew up with this understanding and since I don't have vision at my teenage and I don't have dream regularly, I concluded that I was not gifted with dreams and vision. My mother is very wonderful she had dreams regularly and sees things ahead before it happened. Her dreams are always accurate, and sincerely I love it because it guided us a little. My dad is a major seer. He constantly receives visions from the Lord, especially when he prays. Sure, he's a praying man. When I was between the ages of ten and thirteen, I used to think that my dad has a gift of prayer. Funny, you see that – gift of prayer. But it was not my fault. I got that because I heard ministers and people of God said it. They use the term to refer to any man or woman who loves praying or usually prays for longer time. I love my

dad so much for his prayer life. Here is a man I knew early in my life that wakes up 4am daily to pray and will continue is praying till 7am. By 6am he would pause his prayer to join us for the daily morning devotion which last for 30mins daily. After the devotion, he would go back to his praying chamber for the next 30mins. It's 7am he would stop the prayer to prepare for work. Imagine, someone doing that for over thirty years, how would vision not rest on such.

WHAT SOME PEOPLE CALL GIFT

DREAMS AND VISIONS

These two are connected with seeing beyond the natural. You see dreams when you sleep or doze off for few minutes but vision is received while actively conscious. Some people prefer to call dream night vision. Truly dreams are vision but you are out of the world (your environment) when you receive them. Some don't like to say they dream because people take dream shared for granted. Dreams are often seen as common thing anybody can have. Some Bible scholars have explained that the reason God uses dreams to communicate to men is because they couldn't hear what He said to them during the day. How will God speak and you will not hear? Even if you are deaf, when God speaks to you, you will hear. God's word is as powerful as God himself - I mean the words that comes out of His mouth - **rhema**. I was taught that childish concept of dreams that God speaks to me through dreams because I was too busy to hear him during the day.

The truth is that God is God and you can't systemize Him that whenever He tries to speak to a man and such was too busy to hear his voice, then the other method He uses is vision. You see that is why believers don't grow because this concept has

created a myopic picture of God in the heart of men. Who do you think God is? You view God as a man whose voice may not be louder to be heard by someone who is busy. If Adam at his fallen state could still hear the movement of God in the garden and spoke back to God, why will a believer not hear God when He speaks? I believe that when God speaks to a righteous man even if he is too busy and occupied in his mind, he will still hear God. Many believers are too dull to understand the ways of God. They say some rubbish that is not consistent with the word of God. No wonder there is no burning desire in the heart of men, the repentance spirit is lost. My question is why will you say God speaks and a man will not hear? Even if your mind is busy or occupied, you can distinctly hear the sound of a thunder, and when you hear it, what comes to your mind? Rain. Immediately you capture the signal, your mind is directed towards rain. Let's imagine that you sundry your clothes before you left home for office that morning. What comes to your mind? You begin to think about the clothes you left outside. But you were too busy thinking about something before the thunder strike. So, you see how the striking of the thunder has diverted your attention to another thing. Likewise the voice of God. When God speaks to you, I don't care how busy your mind is, you will hear him, and it is now left to you to concentrate on what He speaks to you.

When God speaks to a man, it is the will of the man either to concentrate or to discern it but very certain, you will hear Him. We must avoid systemizing God to a particular method. Doing that is a barrier to spiritual progress. We now know that God doesn't speak to you through dreams because you are too busy or preoccupied in your mind during the day. And by the way there is no scripture that is of personal interpretation and by the mouth of two or three witnesses the truth shall be established.

Can you show another passage apart from Job that shows God speaks through dreams at night to you because you were busy to hear Him during the day and He wants to get across to you that day? I hope you know God has no time and not bound by days, weeks or months. He is not time bound but external bound. He lives in the eternity and over there, the past, present and future are present with Him. So, God is not bound to speak something to you in a particular day. He's God. God who called Moses at eighty years in the same God that called Samuel at nine years. Don't systemize God.

Another reason people despise dream is because magical powers can be employed to make dreams. When you hear a herbalist put a young man in the dark for three days for diabolical empowerment for wealth. He goes on to say on the third day that they will bring water to the person in the dream, you will be instructed to drink the water and take your bath with it. The man did that and was told "you will be rich but if your person in the dream rejected it, it means you can't be rich." Truly the things happened exactly the way he was told. He saw it and did exactly what he was told to do. Do you see that - obviously the diabolic effect of power is seen in dreams?

Psychology has also taught how to make dream. Psychologists lay out some procedure to get the kind of dreams you want. I tell you, if you follow those procedures you are likely to make the dreams. Is that not powerful? I guess you will say yes, but the fact is that such is a futile.

In the religious world, there are dreamers who know what to do to generate dreams. Some of this people will not make incantation or enchantment, if you stay around them, they will do it as magic, and you will be amazed with the secret they will download to you. Let me share this with you. I know of dreamers

in a particular religion, what they need you to do is to tell them your problem or what you want. After all your explanation, they will request you write your name on a paper. Then, they go to bed at night placing the paper with your name under their pillow and place their head on the pillow. I tell you they will see everything about you in their dream – they will see the source or cause of your problems, the story you told them and the way out. Just like the young girl Paul cast out the spirit of divination did not need to make incantation or evoke a spirit before she told things which were eventually confirmed as fact, likewise the same with those dreamers. They have no shrine neither do they call on any spirit but we sure know that there is a spirit behind what they do. They have unholy spiritual technology inside of them that power such capacity to see. Just like the young girl brought money for her master through her divination so it is the same with dreamers. That is their source of living and survival. Nobody needs to tell us that this is not from God.

YOU ARE A DREAM MAKER

Do you realize that you can make dream yourself without the help of anyone? To be sincere, when I understood this basic fact, I reasonably concluded that 40% of the dream I had were made by myself. If you will be loyal to yourself, I believe you will also come to that conclusion but yours may not be up to 40%. I guess that there could be some people who will conclude that 90% of dreams in their lives were made by themselves. I believe at the stage, you greatly anticipate to know how you made dream yourself. You want to know if truly, you are a dream maker.

Everyman is a dream maker. Everyone on earth except those whose minds are ill medically have made at least three to five dreams in his or her life. When I refer to dream here, I don't

mean imaginary picture of what you want to do or be, but the visions you see when you sleep or doze off. To be realistic, nobody is intentional or deliberate in making their dream. You made your dream not because you wanted to or desire to make it but you made it because you already created something in your mind. Man himself is a god. He has unlimited power as long as he understands that his mind is not limited. But, there's no man that can explore the unlimited power of the mind. It is confirmed that mankind from creation have not used up to 10% of the mind. How will the 90% look like? According to biblical account, the earth has run for more six thousand years now but from the Archeologist perspectives or account, the earth has run for billions of years.

The Bible shows us the dimensions of God: Father, Son and the Holy Spirit. So, we also discover the dimensions of man: spirit, soul and body. Scientist informs us about two hemisphere of the brain: the left hemisphere side as the logical part of man and the right hemisphere as the creative part of man. The scientists see the left as the spontaneous, imaginable area where man can see the unseen. They observe the right side as the ordered, reasonable area which helps men to carry out their thinking effectively.

Psychologists identify that man has three corporate mind which are: conscious mind, the subconscious mind and the Supra conscious mind. Personally, I have come to identify three areas which are: mortality, immortality and eternity.

Both mortality and immortality are created. They both have beginning but eternity is not created and has no beginning. God is the King eternal, immortal, invisible. God is eternal in Himself, your body is mortal. Your soul and spirit is the immortal part of you. Zoe (the God kind of life) inside of you is not only immortal

but eternal.

RESOURCES RESPONSIBLE FOR DREAM MAKING

How can a man make dream? Three resources are responsible for the making of dreams by man. Man apply these three daily. The three resources responsible for dream making are:

1. Belief.
2. Desire.
3. Thinking.

1. BELIEF

Whatever you believe has the capacity to generate dreams in your sleep. Belief here does not refer to your religion but a conviction that sustains your principles, motivation and expectations. Your belief determines your response to life. Every man has a belief system. The following affect or influence your belief:

1. What you think

What you think in your mind or logical brain can create your belief. Belief gets activated when you make a conclusion about a matter. Every other factor that influences our belief is the core to our motivation and expectation. Thinking is the process that creates all these. Belief is actually a program in you but thinking is a programmer. Whatever is believed in you is the conclusion of your thinking. It's only the preaching of God's word powered by the Holy Spirit that overpowers the thinking

process of human mind before believing.

1. What you say

What you say can affect or influence your belief system. Words we say have inexplicable way of getting into our sub-consciousness to create our belief. That is why I admonish people to always say positive things. Talking affect your thinking and your thinking process your belief. If you are feeling unease in your body and you begin to talk about it, suddenly you will notice you will begin to think about it. Get this key don't talk about whatever you don't want to think.

1. What you see

What you see can form a belief inside of you. Whatever you see is through your receptive signal into your thinking. When the process of thinking is concluded, it is programmed to be your belief. Let's analyze the process of discovering a wife. This fact is concluded to be 70% realistic. You saw her, you then thought about her that she is beautiful, good looking, complementary and good to be a wife. and made a conclusion to go for her. When you make the conclusion, then you have generated a belief that someone is your wife. Obviously you see how sight influence your thinking and in turn determine your belief. Like I said, this is not in all cases because I have seen folks who were desperate for marriage and they married spouse that were arranged for them either by church leaders or parents.

If you desire to be a preacher, the moment you fix your mind on the style of a particular preacher that you see or watch often, you will soon discover that you begin to imitate that preacher.

What happens is your mind will form a belief within you that you should be like whoever you admire which is good. When your thinking processes reach a conclusion, a belief is formed in you. You suddenly believe that you can do the same, you seek opportunity to express your new belief. What many people believe today is what they concluded in their mind.

1. What you hear

What you hear can form the core of your belief. You realize faith preachers always quote “faith comes by hearing...” Your thinking process receive signal from your ears. This is then processed to form a core of your belief. As a student of language, we were even taught receptive skills.

The good news I have for you is that when anointed words are released, they immediately become your belief without thinking. The anointing of God’s word doesn’t need thinking because it has the capacity to go beyond your brain or mind. It takes things directly into your spirit. Your spirit man suddenly gets activated and alive. What thinking can’t do, the anointing of God’s word will do.

1. DESIRE

Your desire can generate your dream. Your desire is not necessarily your belief. Desire also uses the resources of thinking. There is nothing you desire that you will not think about. Desire determines your thinking and thinking influence your decision. It is a force of change and progress. Whatever you desperately

desire saturate your sub consciousness. If you desire something so much, you may begin to see it in your dreams. Bachelors and spinsters miss it here, especially the Christian brothers and sisters. A bachelor who loves a lady dreamt that he saw himself and the lady dancing in the aisle to the altar or both sitting side by side at reception about to make a toast or do the cutting of cake, then, the brother wake up and concluded God had showed him his wife. Can I tell you the truth? It may not be from God neither from the devil. You generate it yourself. You asked me how? Your desire produced it. It's produced because that desire has gotten into your sub consciousness and you need to understand that when you sleep and see yourself in a dream, you are in the realm of sub consciousness. That thing came out of your dream because it has already been actively registered in your sub consciousness. You may say but I never thought of dancing to the altar with her, neither do I think we sat beside each other at any reception. I felt you have never thought of such before, but you have thought of you marrying each other, staying together for the rest of your life. Your sub consciousness is a counterfeit creator. Since it has picked what have been registered, it is its duty to produce image that can communicate to you that your desire has gotten to it and is achievable.

Your consciousness does not need to tell your sub consciousness what to do. It is an expert in creating images and events. It only created the church and reception scene because it is aware that you will best understand that. In the past, what people see is someone coming to assist them at the well to help draw out water or lift a bowl on their head. But we don't have much of that today in our world. Why? There is advancement in civilization now. The people or guys of today no longer understand that form of communication. So, the subconscious mind had to produce

images and events they can relate to for easy communication.

Please note I am not saying God does not communicate about marriage or spouse to people through dreams. What I am explaining is that it is not all dream of such that comes from God. The essence of this book is to inform us that some factor apart from God can produce dreams men have. God gives us dreams but desire also can produce dreams and this is achievable when registration is made into the subconscious part of man. For example, whatever comes to the mind of a man when he wakes up is a function of what is inside the sub consciousness of that person even if that thing is an inspiration or revelation from God. The fact is that such has been registered in your mind before then. It only occurs to you that it's fresh but if you check it very well, you will discover that it's just a remembrance of something you have received before now. Consciously, your decision brings your desire to pass or fulfillment but subconsciously, your decision is not needed. That is why dreams are not your decision. What you see is not your decision and can never be your decision but it can be a product of your desires.

At a time in my life, I used to see myself in a dream in the presence of people ministering to them – preaching and teaching. As I grew older and matured, I found out that some of those things are not from God, they are created from my sub consciousness because that's my desires, I long for it, to see it came to pass. Why I know they are not from God is because, in my conscious (physical) state, I have seen such in my imagination while working on the street or by the road side. I think within me one day I will stand before people and preach and teach: I just have passion for the lost and see men become matured in the kingdom. I was not satisfied with a superstar kind of ministry that produces a star out of the pastor of the house and

make members spectators in the kingdom. I believe in unity and togetherness of purpose. I strongly desire to see mighty men and women arise. My desires focus on seeing new society. Things can change, our nation can be transformed through unexpected revolution. We can raise mature, excellent and proficient leaders that will change the cause of things in our nation.

My opinion is that you can be in politics and be correct. We need influence oriented personalities. We don't just need leader that are positional but visionaries and influence- minded. All these are my thoughts and I greatly desire to see them come to pass. Then one day, I heard God said to me "raise minister and leader for the Lord" I couldn't say or describes how it came to me but I just know this is God speaking to me. Ever since then I knew God has called me to raise ministers and leaders for the Lord. As we raise minister in the church, we raise leader in sectors, governmental and nongovernmental organizations. After I got this message from God, it has been my desires to see the minister and leader raised. I think and talk it. I discovered to be seasonal is to know how to keep myself inspired and to be relevant requires me to be current.

Any man who is always inspired and current about what is happening in this world, the new style of doing what he's doing, his profession or project will surely be seasonal and relevant.

How to be inspired?

How can you get inspired? Ask yourself what do I do in the past that usually get me inspired? If you find this, then keep doing it. Don't stop it because your conscious system has mastered that style for inspiration. Maybe you discover that some people around you are the one who get you inspired, then try to find out and get connected to them again. That is if you notice they

are still on the track. If you want to do exploit and always increase your desire, then surround yourself with inspirers. Check around your life, there's someone God has place in your life to always inspire you. Always listen to inspirers. It will help you to be seasonal. I was afraid of leaving campus environment because of what I saw as the outcome of the effect of moving out from there to the other world. I saw many fervent and influential believers and minister who left campus became another thing. They became cold, lukewarm and lost influence. I thought Satan has gotten them or the presence of the world choked them. I tried all means to find out but later realized one of the causes why men failed was because they don't know how to get themselves inspired.

Those campus ministers don't know how to get themselves inspired when they left campus. I now know the key. I don't need to seek any pastor to speak to me or pray for me. I now know how to keep myself going in life. Try to pause now. Discover what gave you inspiration on campus? Identify those people or the person who inspires you?

Now, you already know what God told me and that created a desire in my heart. God's word to me become my desire. I had a lot of dreams but not all are from God, I generated those dreams myself not because I was to but because it desired to. Such is your experience also. You have generated, created dreams unknowingly not because you want to or basically it has to. The reason it has to is to assure you that what you desire is achievable but it is not a guaranteed. As I sat to analyze my experience, i discovered God showed me some dreams while my mind produced the others. I remember the first time I saw an angel was in my dream and the picture I saw still lingered in my memory till today. My perspective of an angel was a

personality with wings just like we were told that angel have wings. I remember vividly when I woke up I couldn't relate that personality to be an angel, it was after two or three few days that God enlightened me that the being I saw was an angel. I remember I slept in my room that night and I had this powerful dream where I saw two personalities, one was tall while the other was very tall. This happened in my second year on campus. I was the assistant General Secretary of my fellowship then. Suddenly I just remember how I didn't share this experience with anyone throughout my stay on campus - it's not that I planned not to tell people but because I didn't remember. God blew his wind on me that I forgot that experience till I left Campus but he caused me to remember now and i am already sharing it. As I write this book, I feel the power of God moving on my body as I share this indelible experience. I didn't see that angel in a vision but in my dream. That angel is very tall - God is powerful. Imagine I had that dream in my room and also saw my room in the dream with the presence of those two angels. The tall one is extremely tall that its head penetrated through the roof. What? I can't actually answer that. But these angelic personality is very tall white as snow, his body is not the appearance of a man. His body round in shape like a can from head to toe. What did I see? One appeared, the other disappeared. I saw the one who just appeared standing beside me while I sat on my bed. All these happened in my dream. Obviously you don't need any man to explain to you that such dream as I had was shown by God and not a product of any belief or desires. My concern is our ability to be able to distinguish between what God showed you in a dream and what your desires produce from you.

1. MEDITATION

From the explanation on belief and desire, you should be able to identify the role of thinking. Your thinking is a processor and a programmer. Whatever gets into your thinking can come out of your dreams. Thinking combines words with images. You analyze things through words but your mind is fixed on an image (mental picture). Do you know when a person begins to think about an interview he or she is planning for, there is high tendency that the interviewee will begin to have dreams, seeing himself before interview panels? It's not all cases of such that comes from God, your thinking can produce it.

From the above explanation, you can now identify resources that are responsible for making dreams. Dreams and vision are not gifts, they are channel of communication – the communication is the spiritual one which transfer from the physical to the metaphysical. You may think within you what about those who have dreams and visions regularly. Such assumption only seems to be correct but if it's extremely wrong. There is nothing like the gift of dreams or gift of vision, - both are channels through which man receive revelation or information from God.

The difference between those who have it constantly and those who received it occasionally is that God specially created some people to see visions or have dreams constantly. Everybody can have dreams, everyone can see vision. It's God desire that we flow with him at any level or dimensions that He brings toward us. Most believers, especially, the conservative ones have systemized God to communicate to them through one channel – the word of God. Truly God communicates with us through his word, likewise, He does the same through vision, also one of the problem of those in the teaching office of the

fivefold ministry is that they are blind trying to raise others blind with their dexterous capacity to analyze and systematically chastise the people with the word they have wrongly taught that vision can be confusing and should therefore be discharge. Well, it is confusing because they themselves are confused. The word of God is the foundation and supreme communication mode but the truth should not push us to put other sources of communication and only stick to the word. I stick to the word and also stick to other channels of God's communication - dreams and vision included.

Therefore, if you have dream or vision regularly it not because you have the gift as it has been established that there is nothing of such. You get it constantly because God choose to communicate with you much through this area. The fact that you see vision for a longer time or more than others doesn't mean you are more anointed than the others. Do not think that there is a special anointing in your eyes that make you see better or more than others. No! You only see more than others because God want it that way.

Regular vision doesn't mean you are called to the office of a prophet or can now assume the position of church. Constant vision doesn't mean you are close to God than the others but because God in his sovereignty chose to relate with you that way.

About the Author

Niyi Makinde is a leadership expert, quotient coach, consultant, author and a Christian minister with an apostolic calling.

His passion is to raise Christian ministers and leaders like-himself, as well as to help organisations and businesses maximize their potentials.

Apostle Niyi Makinde has been in Christian ministry for over fifteen years. He is the President of Rebirth Global Church, a network of churches across the globe on a mission to empower believers to fulfill their God-given tasks on earth.

He is an apostolic oversight and covering for many other ministries, networks and churches.
